NOTES

CC to be affixed to gabion cage using hog rings. A pneumatic auto-fed hog ringer is recommended for larger installations.

The gauge of hogring should be specified by the contractor and be appropriate for the gabion cage. Typically 9-12mm hog rings are used.

Hog rings should be stainless or galvanised.

LEGEND:

- CC GABION REINFORCEMENT ANTI-VANDALISM MEASURE

SECTION VIEW

CC layers anchor trenched by 300mm at foot of gabion.

FRONT ELEVATION VIEW

CC layers secured to gabion cage at approx. 100mm intervals along edges with pneumatically applied hog rings (C-clips).
